Ball Bearing Slides - 35mm (HT), 30KG

Special Features

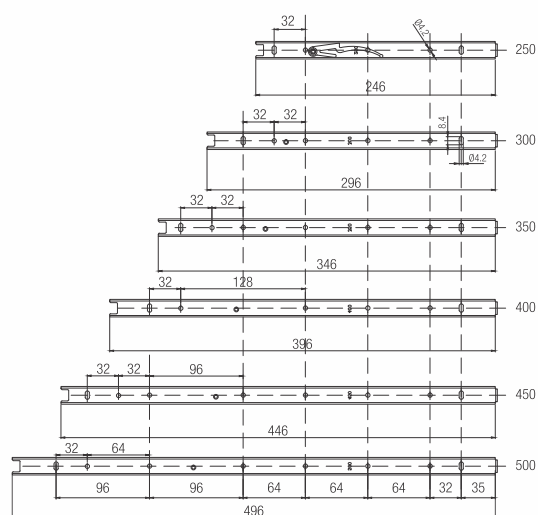

- Precision ball bearing.
- Full extension of drawer.
- Direct fitting from front.
- Removable drawer with Latch.
- Cycle test: 50,000 cycles.
- System 32 Installation.
- Load capacity: 30 Kgs.

Specifications

Code Nos.	Length (mm)	Extension (mm)	Max Load (kgs.)	Finish
2/2 STDSM 25	250	254	30	Zinc White/ Zinc Black
2/2 STDSM 30	300	304		
2/2 STDSM 35	350	354		
2/2 STDSM 40	400	404		
2/2 STDSM 45	450	454		
2/2 STDSM 50	500	504		

Fitting Instructions

1. To install slide 12.7 to 13.0mm side gap per side is required between cabinet and drawer. (Refer Fig. 1)
2. Depress latch and remove the inner slide. (Refer Fig. 2)
3. Fit outer (fixed) slide onto the inside of the cabinet, access to holes can be got through slots in intermediate slide.
4. Slides should be fitted parallel and screws tightened fully to avoid gaps.
5. Fit inner slide onto the outside of the drawer.
6. Now slide the drawer with inner slide engaged on to the intermediate slides on the cabinet till the latch will automatically engage.

Ball Bearing Slides for Steel Furniture - 35mm (HT), 30KG

Special Features

- Ideal for Steel furniture.
- Full extension of drawer.
- Direct fitting from front.
- Removable drawer with latch.
- Cycle test: 50,000 cycles.
- Total height: 35mm.
- Load capacity: 30kgs.

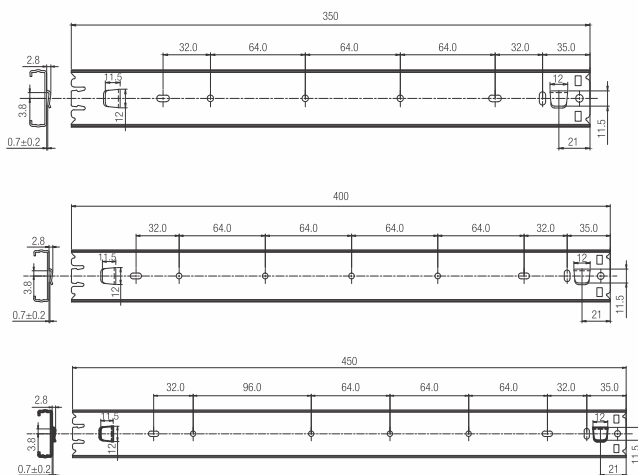

Fitting Instructions

1. To install slide 12.7 to 13.0mm side gap per side is required between cabinet and drawer. (Refer Fig. 1)
2. Depress latch and remove the inner slide. (Refer Fig. 2)
3. Fit outer (fixed) slide onto the inside of the cabinet, access to holes can be got through slots in intermediate slide.
4. Slides should be fitted parallel and screws tightened fully to avoid gaps.
5. Fit inner slide onto the outside of the drawer.
6. Now slide the drawer with inner slide engaged on to the intermediate slides on the cabinet till the latch will automatically engage.

Ball Bearing Slides - 36mm - Soft Close

Special Features

- Precision ball bearing provides smooth operation.
- Its soft close feature closes the drawer effortlessly without any banging.
- Cycle Test: 50,000 cycles
- Height: 36mm
- Load capacity: 30Kg
- Finish: Zinc White

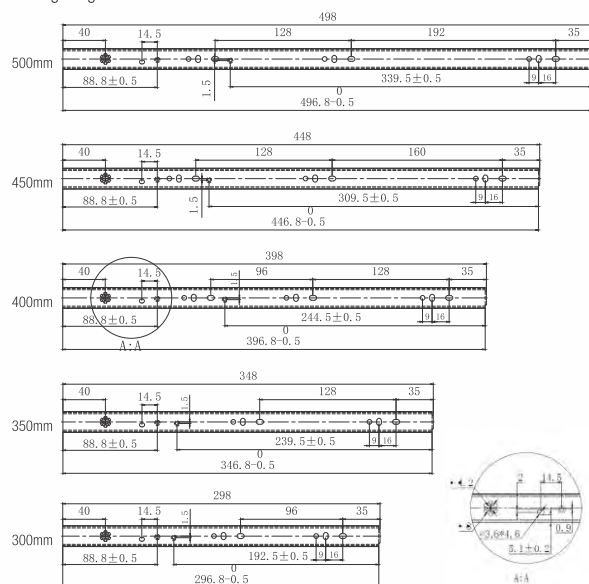

Fitting Instructions

1. To install ball bearing slide, 12.7 to 13.0 mm side gap per side is required between cabinet and drawer (Ref. Fig. 1)
2. Depress latch and remove the inner slide (Ref. Fig. 2)
3. Fit outer (fixed) slide on to the inside of the cabinet, access to holes can be got through slots in intermediate slide.
4. Slides should be fitted parallel and screws tightened fully to avoid gaps.

Drawer Adjustment

Aluminum back panel width L= LW(Cabinet Net Width)- 21mm

Bottom Mounting Drawer Slides

Special Features

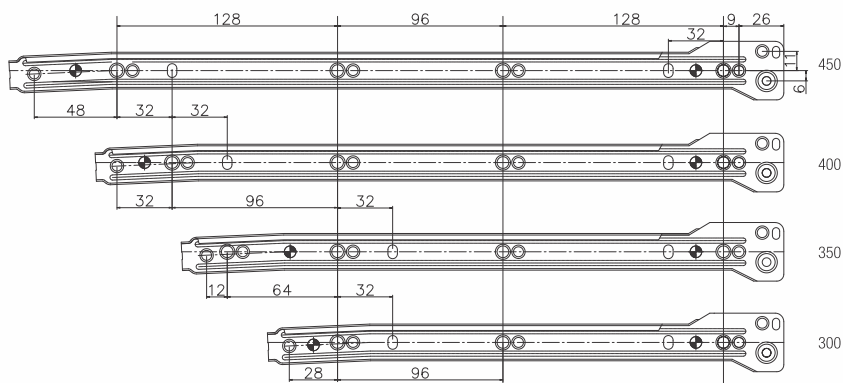

- Smooth silent roller system
- Right side pair has lateral guiding.
- Left side pair has side gap adjustment.
- Tilt and remove drawer.
- Stopper to prevent drawer from falling.
- "System-32" compatible.
- Ribs provided for strength.
- Load capacity - 20 Kgs.
- Cycle Test - 50,000.

Fitting Instructions

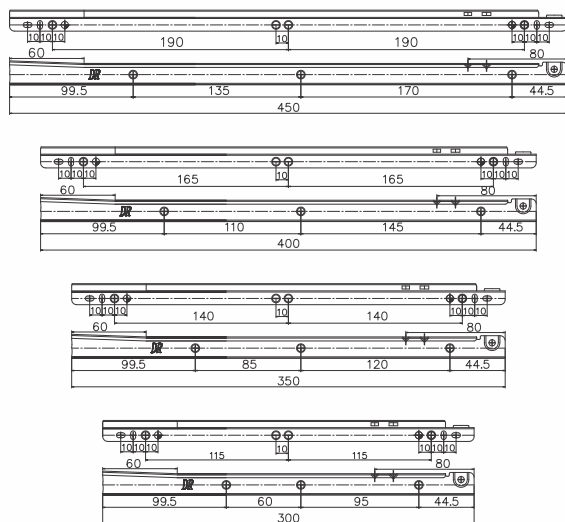

1. Side gap of 12.7 mm (1/2") per side required (Refer Fig. 1).
2. 25.4mm(1") clearance from top edge of drawer required to tilt and remove drawer (Refer Fig. 2).
3. Fixed and moving slide should be equally offset by 2mm for Auto-Closing (Refer Fig. 2).
4. Recess screw heads to avoid interference.
5. A set of slides must be fitted parallel and at same heights to each other.

Butterfly Wall Plug

Special Features

- These plug gives a strong grip in plaster board and similar materials.
- Suitable for Board thickness from 9 to 12mm
- Load capacity: 30Kgs

Specifications

Item	Code Nos.	Finish
Butterfly Wall Plug	Z-BWP-40	White

Fitting Instructions

- Drill Ø10.0 mm hole in the ply / board as shown in fig. 1.
- Insert the plug in board / ply with help of Nylon hammer and tighten with help of screw provided. For details refer fig. 1

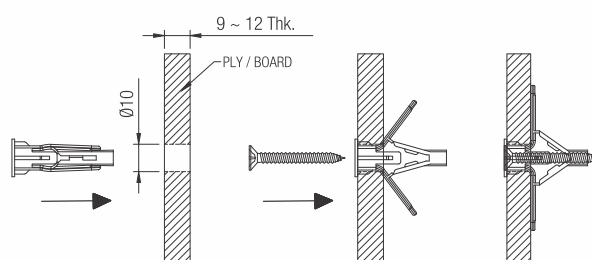

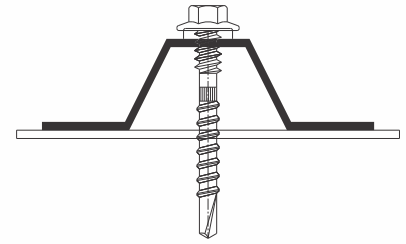

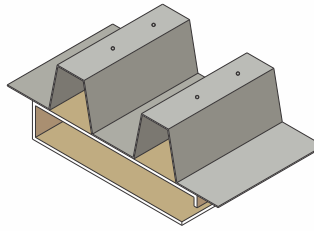

Fig. 1

Crest Fixing

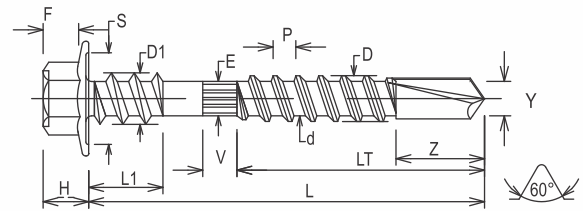

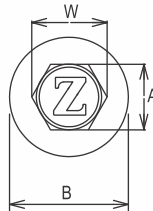

Special Features

- Made out of hardened C-1022 steel for better strength & durability.
- Used for crest fixing of roofing sheets / steel purlins up to 4.5mm thick.
- The tips of the screw are so designed that it can perform a self drilling while screwing.
- Flanged head covers more area. EPDM washers provided.

Square Lock Popular

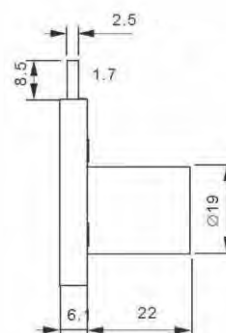

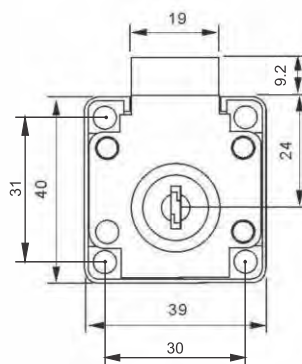

Special Features

- Available in 22mm cylinder housing length
- Click action mechanism
- Reversible key insertion
- Die cast body
- Finish: Nickel Plated

Specifications

Item	Code No.	Finish
Square Lock Popular 22 mm	Z-SQLP1-22	Nickel Plated

Square Lock

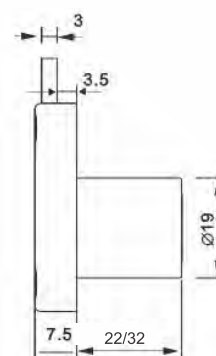

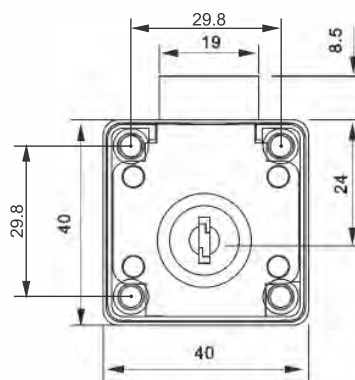

Special Features

- Available in two cylinder housing length : 22mm & 32mm
- Click action mechanism
- Key removable in locked and unlocked position
- Available with metal keys

Specifications

Item	Code No.	Finish
Square Lock 22mm	Z-SQL1-22	Nickel Plated
Square Lock 32mm	Z-SQL1-32	

Front Multi Drawer Lock

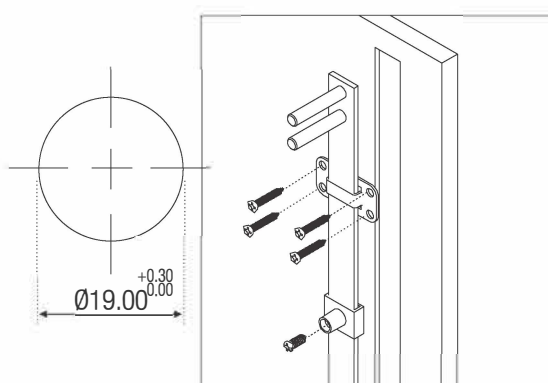

Special Features

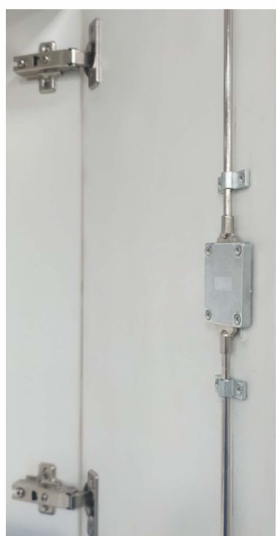

- Front locking system with adjustable locking pins
- 180° rotary lifting pin movement
- Click action mechanism
- Key removable in locked and unlocked position
- It can lock up to three drawers
- Can be used for Bottom Mounting, Full Panel & Telescopic Drawer Slides with 'ebco; MDL brackets
- Available with metal keys

Specifications

Item	Code No.	Finish
Front Multi Drawer Lock – 600mm	Z-FMDL60	Nickel Plated

Wardrobe Lock 2 Point - Inset

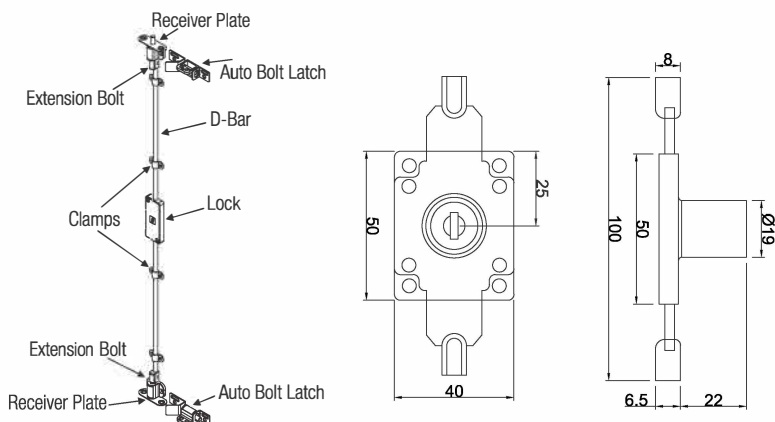

Special Features

- Specially designed for tall inset wardrobe shutter locking.
- 2 point locking is achieved at the top and bottom with the turn of a key.
- Can be used with ebco auto bolt latch & wardrobe latch to achieve double shutter locking.
- Rod length: 995mm

Specifications

Item	Code No.	Finish
Wardrobe Lock 2 Point - Inset (22 mm)	Z-WL2-22-I	Zinc White

Sliding Wardrobe Lock

Special Features

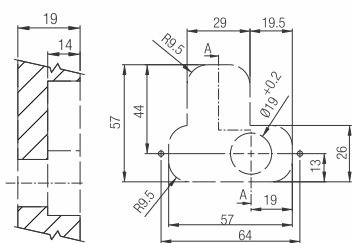

- Ideal for Sliding Wardrobe Shutters
- Click Action mechanism
- Key removable in locked and unlocked position.
- Size: 18mm

Specifications

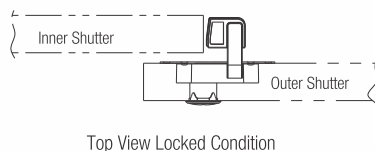

Item	Code No.	Finish
Sliding Wardrobe Lock 18mm	Z-WLS1-18	Nickel Plated

Fitting Instructions

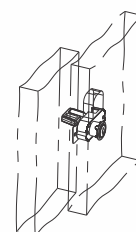

1. Drill Ø19.0mm hole & cutout the cavity 11mm deep for 19mm board as shown in Fig. 1.
2. Insert the lock into the cavity in sliding shutter and screw the cover plate as shown in Fig. 2.

Bird Spikes

Special Features

- Humane method to stop birds, pest or vermin from landing and roosting on ledges, roofs of buildings.
- **Harmless** : Does not harm birds as they do not land and fly away.
- Smaller spike prevents rats and other vermin. Ideal for compound walls.
- **Flexible** : Can be applied on curved surfaces, circular pillars and it can be to length for exact fit.
- Being made of Polycarbonate -
 - a) **Weather Resistant**: It is suitable to withstand any kind of adverse climatic condition and temperature.
 - b) **Safe** : It is non - conductive and safe, can be easily attached to TV discs/antennas or cables running across the ledges / buildings.
 - c) **Cost Saving** : Easy to install, maintenance free and keeps the building clean and free from bird droppings.

Specifications

Code No.	Size	Finish
6/4/BS 18	450 mm	Clear

Watch Video

Installation Guidelines:

The **first step** is to measure the length and width of the area that you want protected. It is important that the entire surface be covered with the spike strips so that birds cannot land behind them and build their nests. In some situations, more than one row may be needed.

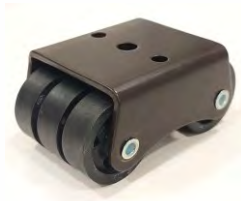

The **second step** is cleaning up the mess left behind by the birds like bird droppings, nesting materials etc. It is recommended that this area also be disinfected to remove parasites and germs due to presence of bird droppings. Use extreme care when cleaning as bird droppings are the cause of many infectious diseases. We recommend you use a dustmask, gloves and when working at heights of over two meters, it is recommended that a safety harness be used. Make sure the surface is dry after cleaning.

The **third step** is to determine how to attach the strip. Use wood screws to fix the spikes on to wooden surfaces. When attaching the spike strips to concrete, stone or any other hard surfaces, use an outdoor construction grade adhesive, like Silicon glue. Use a thick layer of adhesive if surface is uneven. When attaching to Pipes, we recommend plastic cable ties to secure the spike strips in place. This is also easy to remove if you need to do any maintenance and the spikes need to be removed.

Appliance Castors

Swivel Castor

Fixed Wheel

Swivel Castor (Bearing)

Fixed Wheel (Bearing)

Special Features

- Appliance castors are ideal for heavy appliances like fridge, washing machine and cooking range.
- Available in fixed and mounted swivel.
- Also with nylon or phenolic (fibre) wheels.

Door Closer 101 - Basic

Special Features

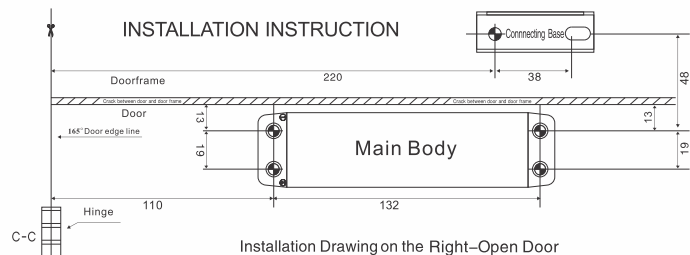

- Adjustable Section of Closing Speed: 120° - 15°
- Adjustable Section of Latching Speed: 15° - 0°
- The door closer is suitable for various doors, such as, wooden door, metal door, glass door, aluminum door, etc.
- The door closer can be designed for non-hold open and 90° hold open.
- Speed adjustment: the fastest closing speed can do within 3 seconds from 90°, the slowest closing can be more than 60 seconds.

Specifications

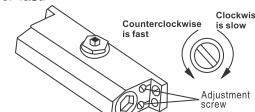

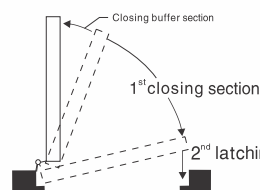

Code No.	Max. Door Width (mm)	Max Door Weight (kgs)	Finish
ZDC-101-B	500-800	25-45	Silver
ZDC-101-B-BL			Black

INSTALLATION INSTRUCTION

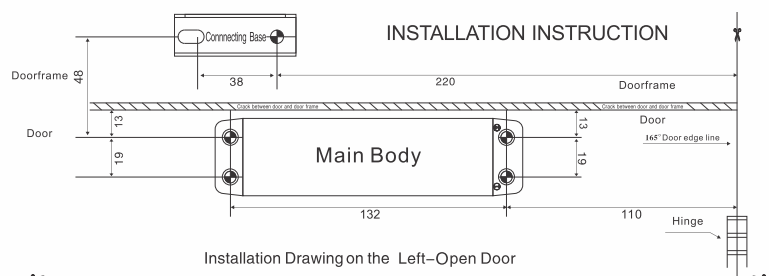

The 1st adjustments screw controls the 1st segment closing speed
The 2nd adjustments screw controls the 2nd segment closing speed
clockwise for slow, and counterclockwise for fast.

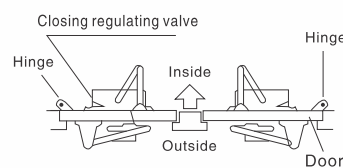

Notice:

Notice:
Not to turn out the adjustment
screw from body surface,
Otherwise, it will be oil leakage
and can not work anymore.

INSTALLATION INSTRUCTION

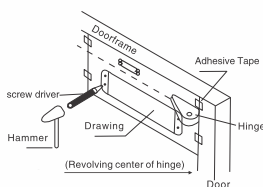

The door closer is suitable for left-open door and right-open door installation.
Please follow the below instruction to decide the open direction before installation.

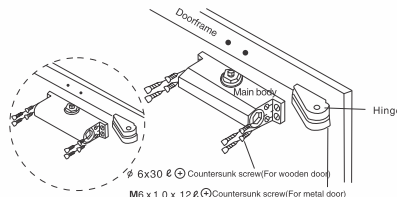

Left-open door Right-open door

Installation process

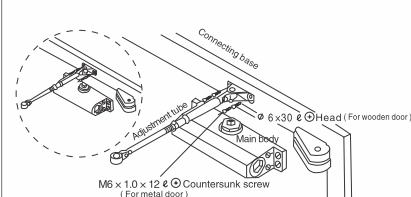

1. According to the size on the above drawing, take off and paste it on the door with the adhesive plaster, mark 4 holes on the door and 2 holes on the connecting holder of door frame and then drill holes of Ø5.0mm.

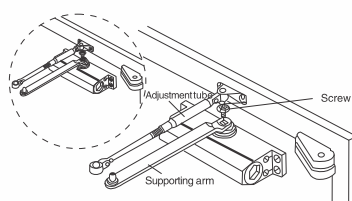

2. Install the main body according to the position of holes on the door, to install the main body and fixed by 4 screws. 4 holes of Ø5.0mm.

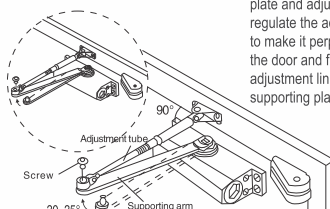

3. Fix the connecting base according to the position of holes on the door frame, to install the connecting holder and fixed by 2 screws.

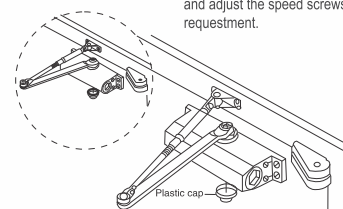

4. Install the supporting plate on the door and fixed by screws.

- Combine the supporting plate and adjustment link to regulate the adjustment link to make it perpendicular to the door and fix the adjustment link and supporting plate by screws.

6. Complete the installation, Put on the cap and adjust the speed screws as requestment.

Door Closer 201 - Basic

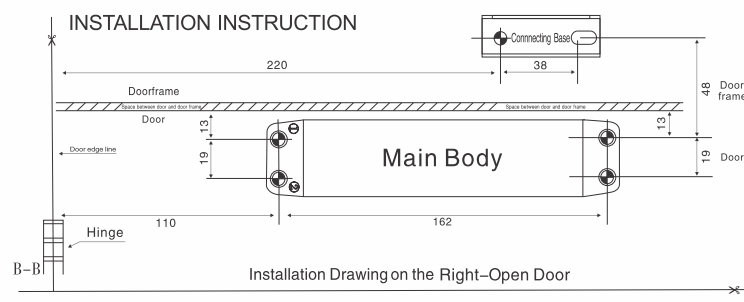

Special Features

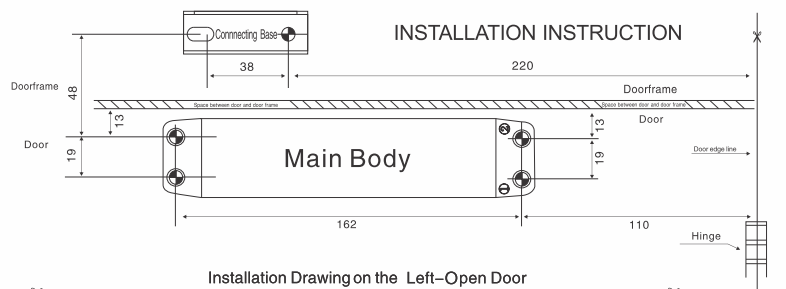

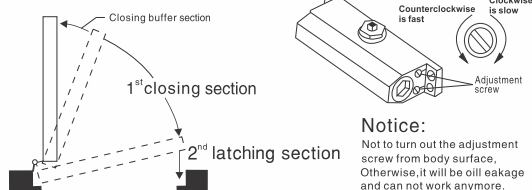

- Adjustable Section of Closing Speed: 120° - 15°
- Adjustable Section of Latching Speed: 15° - 0°
- The door closer is suitable for various doors, such as wooden door, metal door, glass door, aluminum door, etc.
- The door closer can be designed for non-hold open and 90° hold open.
- Speed adjustment: the fastest closing speed can do within 3 seconds from 90°, the slowest closing can be more than 60 seconds.

Specifications

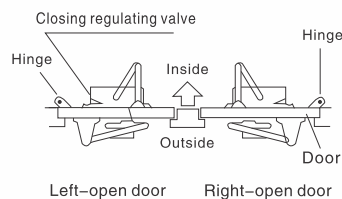

Code No.	Max. Door Width (mm)	Max Door Weight (kgs)	Finish

3. Fix the connecting base according to the position of holes on the doorframe, to install the connecting holder and fixed by 2 screws.
4. Install the supporting plate on the door and fixed by screws.
5. Combine the supporting plate and adjustment link regulate the adjustment link to make it perpendicular to the door and fix the adjustment link and supporting plate by screws.
6. Complete the installation put on the gear cap to finish this installation.

Floor Spring 90

Special Features

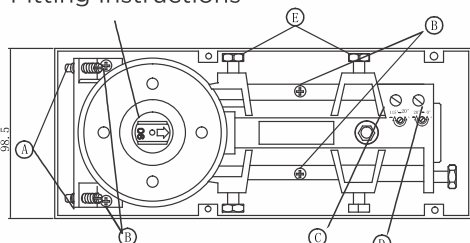

- Max. opening angle : 120°
- Hold open angle : 90°
- Open in both directions

Specifications

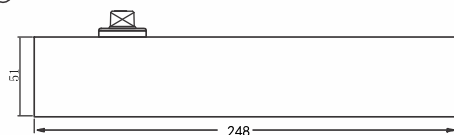

Code No.	Max. Door Width (mm)	Max Door Weight (kgs)	Finish
ZDFS-90	900	90	Brushed Steel

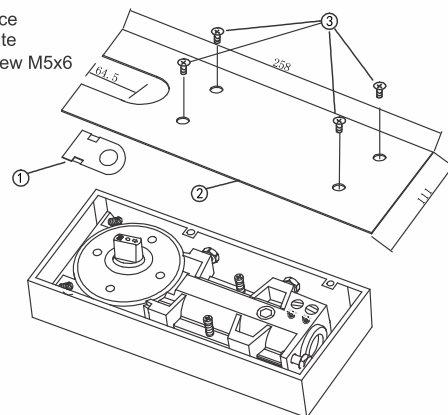

Fitting Instructions

- A = Fixing Screw
 B = Height Adjustment Screw
 C = Regulation Valve 90°~20°
 D = Regulation Valve 20°~0°
 E = Left & Right Adjusting Screws
 F = Pivot Centre

- 1 = Insert Piece
 2 = Cover Plate
 3 = Fixing screw M5x6

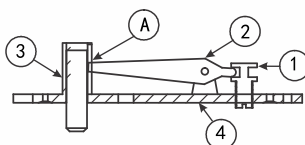

1. Preparation works

Mill or route door and frame to accept relevant top centre parts.

2. Top Centre. frame portion

To change the extended "throw" of the pivot pin 3 proceed as follows: Unscrew shoulder screw 4, turn. adjustment screw 1 counter clockwise until pivot pin 3 and rocker arm 2 can be removed. Reassemble in pivot pin 3. Maximum "throw" is achieved with rocker arm 2 in position A.

3. Top Centre. door portion

Install pivot to door section as shown. Ensure that the top centre is Properly aligned with floor spring.

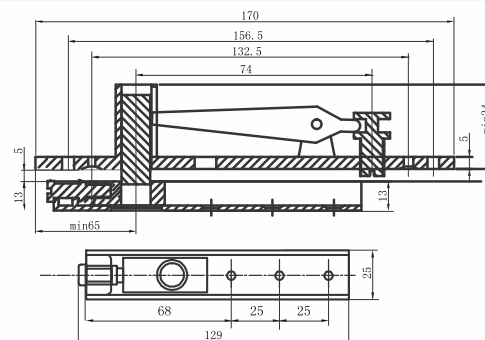

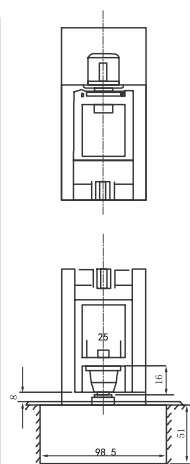

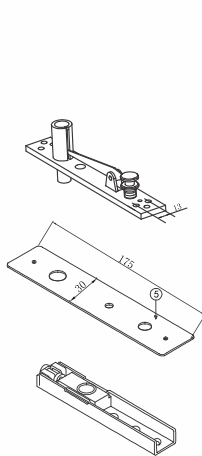

4. Installation of door

Bring door gently down onto floor spring; open door to gain access to top centre; lower pivot pin 3 into bearing by turning adjustment screw 1 clockwise.

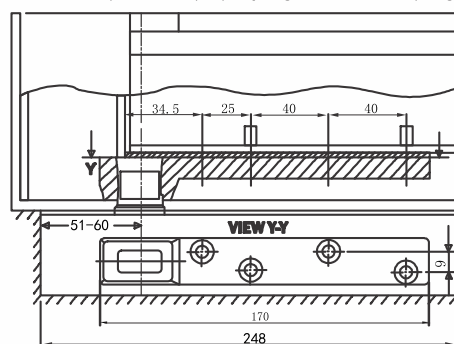

Ensure proper engagement of pivot pin into door portion of top centre.

5. Attachment of cover plate

Secure cover plate 5 to top centre frame portion by using two (2)M4x6 screws provided.

Ensure that top centre is properly aligned with floor spring.

Adjustment in cement box: To adjust the position of floor spring in cement box Loosen fixing screws (A). Move floor spring to required position and use screws (B) for height adjustment. Retighten screws (A) after adjustment.

Centre hung doors: For centre hung doors, floor spring should be in centre of cement box. Maximum door opening angle is 120° in each direction. For door opening upto 120° door stop MUST BE FITTED. Ensure that top centre is properly aligned with floor spring.

Adjustment of Closing Speed: To Regulating Valves (C) & (D). (C) decrease closing speed, (D) increase closing speed.

Valve C : controlled closing range 90°-20°. Valve D : controlled closing range 20°-0°.

Attachment of Cover Plate: Press insert piece (1) into gap behind spindle and secure cover plate (2) to floor spring with fixing screw (3)

Floor Spring 120

Special Features

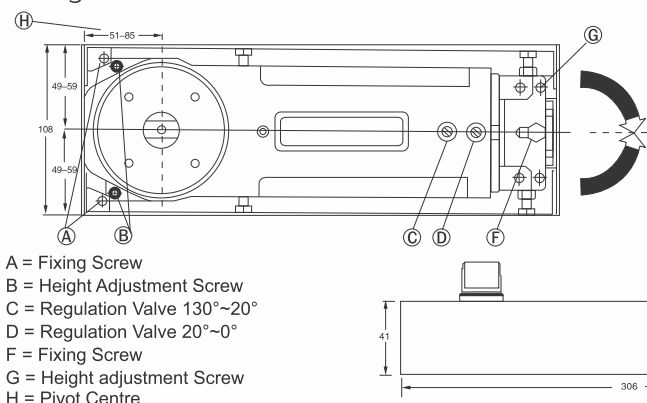

- Max. opening angle : 130°
- Hold open angle : 90° - 105°
- Open in both directions

Specifications

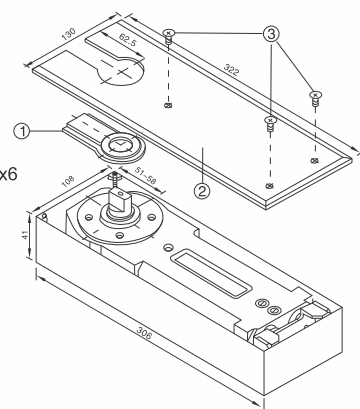

Code No.	Max. Door Width (mm)	Max Door Weight (kgs)	Finish
ZDFS-120	1200	120	Brushed Steel
